

GREEN JAY

Coloring Page

Green Jays are a noisy, green, yellow, and blue bird. They are a tropical bird found in the southern tip of Texas. Their population is currently stable and even increasing, although the population in Texas has declined. They make their homes in woodlands and brush. Green Jays enjoy eating insects, fruit, and small vertebrates. Green Jays are one of the few birds to use "tools". They use sticks to pry up bark to find insects to eat. Green Jays are permanent residents and are non-migrating.
