

YELLOW-CROWNED NIGHT-HERON

Coloring Page

Yellow-crowned Night-Herons are short, stocky, and gray with short legs. They have a black head, white cheeks, and yellow legs. This heron is found in coastal estuaries along the southeastern shoreline. Their population is stable with some recent expansion. They make their homes in bayous, streams, and swamps. Yellow-crowned Night-Herons feed on crabs and crayfish. They migrate south, some as far as Panama.
